

Business opportunity for
automation companies

A shortcut to becoming a successful integrator of industrial robots

Business opportunity for automation companies

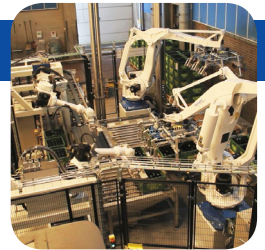

Pursue new business opportunities without making substantial investments

As a Robotics Europe Integrator you have the chance to grow your revenue without adding significant costs to your business. Robotics Europe invites you to becoming a member of our network of services and sales professionals.

A broad and competitive program of reliable industrial robots

Robotics Europe imports and distributes industrial robots from Hyundai Robotics, which offer a program of highly competitive robots for welding, material handling, sealing, painting, assembling and palletizing.

As a Robotics Europe Integrator you have the opportunity to offer turnkey robotics cells for your industrial customers.

Grow your revenue without adding significant costs to your business

Robots for a variety of tasks and business segments

The industrial robots from the global leader, Hyundai Robotics, are used in all kinds of industries for a variety of tasks - such as welding, material handling, sealing, painting, assembling and palletizing.

The program ranges from small rapid 6-axis robots with a payload of 6 kilograms to large handling robots with payloads up to 500 kilograms. The robots are supplied with a modern controller unit with numerous capabilities of communication. For manual operation and programming Hyundai supplies its award-winning teach pendant.

Modern training facilities at your service

We put our modern training facility situated in the south of Denmark at the disposal of all Robotics Europe Integrators. The centre has class rooms and hands-on robotics cells for the theoretical and practical training.

The training centre employs high-end robot programmers, who draw on years of experience with the implementation of robots into industrial facilities.

The centre is open for Robotics Europe Integrators and their end-users.

Fast delivery through an extensive stock in Europe

Robotics Europe makes every effort to remain your professional partner in all aspects of the robotics business.

We have an extensive spare part stock at the headquarter in Denmark in order to ensure fast delivery in all European regions. Combined with our global logistical setup we are able to serve our integrators in the best possible way.

Our stock contains complete and delivery-ready robots as well as relevant and critical spare parts.

What are the advantages of becoming a Robotics Europe Integrator?

- **Grow your automation business without making large investments in marketing, stock, etc.**
- **Enter the market of robotics under guided, safe, and professional conditions.**
- **Draw on many years of experience within sales and marketing of robotics projects.**
- **Quickly find solutions to technical problems through our team of skilled support.**
- **Access to modern training facilities.**
- **Access to professional marketing material.**
- **Fast delivery.**

Robotics Europe in short

Robotics Europe is the sole European importer of industrial robots from the Korean supplier, Hyundai Robotics - a global leader within industrial engines and machinery.

Robotics Europe is a sales and service partner committed to the process of providing the best possible technical and commercial assistance to its network of system integrators.

We set up and support integrators of robots in all member states of European Union.

Robotics Europe has an extensive stock and modern training facilities at its headquarter in Denmark.

Our members of staff are committed and skilled robotics specialists with in-depth knowledge of programming, installation, sales, and marketing.
